

BASHO TIMOTHY

Basho is a very aggressive, early maturing timothy.

Basho adds palatability, spring growth, health and winter hardiness to the stand. With good persistence and earlier maturity, Basho works great for haying and is equally suited for pasture mixes and straight timothy hay stands.

Key Features

- High Yielding
- Early Maturity
- Good Spring Production
- Winter- Hardy
- Persistent High feeding value
- Suitable for hay, silage and grazing

Establishment:

Seeding Rate: 10-15lbs/A

Seeding Depth: 1/4" to 1/2"
