

# KF FIBER PRO 72

KF FiberPro 72 is a medium season forage sorghum with excellent yield for maturity and superior forage quality potential. The BMR-6 forage sorghum provides exceptional nutritional value. The Brachytic dwarf trait adds a much tighter distance between internodes, allowing for better standability. KF FiberPro 72 is adaptable and well-suited for full or limited irrigation or high yield dryland.

- Brachytic dwarf genetics provide stout stalks for excellent standability
- Exceptional digestibility from BMR-6
- Great yield for maturity
- Excellent silage choice

## Characteristics & Ratings

**Days to Soft Dough:** 95-100

**Yield for Maturity:** Excellent

**Forage Quality:** Excellent

**Digestibility:** Excellent

**Seedling Vigor:** Excellent

**Plant Uniformity:** Good

**Recovery After Cutting:** Good

**Standability:** Excellent

**Downy Mildew:** Good

**Anthracoze:** Excellent

**Fusarium Wilt:** Excellent

## **At A Glance:**

- High yielding performance
- BMR-6 For superior forage quality
- Brachytic dwarf genetics provide stout stalks for excellent standability.
- Excellent silage choice

## **Uses:**

Soft dough silage harvest

## **Establishment:**

**Seeding Rate:** 80-100K lb/Acre

**Seeding Depth:** 3/4" to 1 1/2"

**Seeding Dates:** After soils are 60 degrees and rising.
