

OVERSEEDER MIX

This all-grass mix was designed to add diversity, improve quality and extend the growing season. With the base of Martin 2 Protek, the mix is tough and tolerant of a wide variety of growing conditions. The orchardgrass, festulolium and prairie brome grass improve the overall quality of the mix while also stretching the growing season.

While originally designed to be interseeded into an existing stand, we have had numerous producers begin a new stand with this mix. Add your favorite legumes and forbs for a diverse, high energy forage stand that is suitable for all livestock classifications.

Establishment

- **Seeding Rate-**
20-25 lbs/A
- **Planting Depth-**
1/4" - 1/2"

Product Formula

Martin II Protek- 25%

Orchardgrass- 35%

Festulolium- 30%

Brome grass- 10%
