

REJUVENATE 2, 4, 6, 8

This interseeding mixture is perfect for maintaining productive, diverse pastures or hayfields. At 20 lbs/ac, you will be seeding:

- 2 lbs/ac of White Clover
- 4 lbs/ac of Red Clover
- 6 lbs/ac of Orchardgrass
- 8 lbs/ac of Fescue

Mixture Components

White Clover

Stolon dense white clover persists through grazing pressure.

Red Clover

Red clover has twice the dry matter of white clover in the summer.

Orchardgrass

Southern selected orchardgrass varieties that have proven to yield well in the humid environment.

Endophyte-Free Fescue

Sturdy endophyte-free fescue.

Key Features

- This mix can help reduce KY-31 toxin load, increase pasture productivity, and offers an excellent mixture for building pasture diversity and rejuvenating pastures each year.

Establishment

- **Seeding Rate (Drilled)-**
15-20lbs/ac
- **Planting Depth-**
1/4"
- **Drill at 1/4" depth-**
Calibrate your drill to ensure an accurate rate.
